SUMMARY

Alexandria University Cybersecurity student and Technical Support Engineer. Passionate about building secure full-stack applications (Angular/.NET) and designing enterprise networks. Seeking an internship to bridge academic theory with professional impact.

EDUCATION

Faculty of Computer and Data Science

Sep 2023 – Present

- Major in Cybersecurity | Expected Graduation: 2027

SKILLS

- **System Administration:** Windows Server 2019/2022, Active Directory (AD DS), Group Policy (GPO), DNS, DHCP, User Access Management, Patch Management, Virtualization (VMware ESXi, Hyper-V)
- **Network Infrastructure:** CCNA Routing & Switching, Routing Protocols (OSPF, RIP), TCP/IP, VPN Configuration (Site-to-Site, Remote Access), Firewalls (Sophos XG, Fortinet NSE4), VLANs, Subnetting.
- **Core Frontend:** HTML5, CSS3, SASS/SCSS, TypeScript, JavaScript (ES6+), Angular 17+, RxJS, NgRx, Angular Material, Tailwind CSS, Bootstrap, Responsive Design
- **Backend & Tools:** .NET (in progress), REST APIs, HTTP Interceptors, JWT Authentication, Postman, Git/GitHub, Chrome DevTools

PROJECTS

E-Commerce Platform | Angular, Flowbite, FontAwesome | [GitHub](#) | [Live Demo](#)

- **Reactive State Management:** Engineered a high-performance shopping cart system using RxJS Signals, enabling real time price calculations and instant state synchronization across the application.
- **API Integration:** Developed HTTP Interceptors to securely handle JWT attachment for authenticated requests and standardize global error handling.

Secure Enterprise Network | [GitHub](#)

- Designed a segmented network architecture for a multi-departmental organization (HR, IT, Sales) using **VLANs and Inter-VLAN Routing (Router-on-a-Stick)**.
- Optimized uplink bandwidth and redundancy between Access and Distribution layers by configuring **EtherChannel (LACP/PAGP)**.

WORK EXPERIENCE

Technical Support Engineer

Jun 2025 - Present

Vijua, Cairo, Egypt

- **SLA Management & Support Operations:** Orchestrated multi-channel technical support (Email/Live Chat), consistently exceeding internal Service Level Agreements (SLAs) by maintaining a high-resolution rate in a fast-paced environment.
- **SDLC Optimization & RCA:** Accelerated Software Development Life Cycle (SDLC) workflows by executing rigorous **Root Cause Analysis (RCA)** on production incidents, preventing ticket escalation, and reducing debugging time.
- **Process Standardization:** Standardized defect reporting protocols in **Trello**, implementing structured reproduction steps that improved developer triage efficiency and reduced bug resolution timelines by 20%.
- **Data-Driven Reporting:** Analyzed critical support KPIs to generate actionable weekly performance dashboards for executive leadership, identifying systemic software vulnerabilities and driving product stability improvements.

COURSES

Full-Stack Web Development (Angular/.NET) – Route Academy

Feb 2025 – Present

IT Infrastructure (CCNA, MCSA, NSE4, Sophos) – IT Gate Academy

July 2024 – Dec 2024

LANGUAGES

Arabic: Native Speaker / English: Advanced Proficiency
