SUMMARY

Full-Stack Software Engineer with a background in Cybersecurity, specializing in secure, high-performance web applications using Angular (17+) and ASP.NET Core. Experienced in Clean Architecture, Redis caching, EF Core, and reactive SPAs, combining scalable software design with RBAC and production troubleshooting.

SKILLS

Frontend: Angular (17+), TypeScript, JavaScript (ES6+), RxJS, Signals, NgRx, HTML5/CSS3, Tailwind CSS, Bootstrap, Flowbite.

Backend & Architecture: C#, .NET, ASP.NET Core (Web API & MVC), Entity Framework Core, Clean/Onion & 3-Tier Architecture, Repository & Unit of Work Patterns, Specification Pattern.

Databases, Security & Tools: SQL Server, Redis Distributed Caching, ASP.NET Core Identity & JWT (RBAC), Stripe API & Webhooks, Git/GitHub, Docker, Postman.

PROJECTS

E-Commerce RESTful Web API | C#, .NET, ASP.NET Core, EF Core, SQL Server, Redis, Stripe API | [Github](#)

- **Architecture & Data Performance:** Engineered a decoupled backend applying Clean/Onion Architecture, utilizing EF Core (Specification, Generic Repository, and Unit of Work patterns) alongside Redis distributed caching to optimize paginated queries and transient cart sessions.
- **Security & Payment Automation:** Secured API endpoints using ASP.NET Core Identity and JWT Bearer authentication (RBAC), integrating Stripe Payment Intents with a webhook listener for asynchronous payment confirmation and order fulfillment.

Gym Management System | C#, .NET 9, ASP.NET Core MVC, Entity Framework Core, SQL Server, Identity | [Github](#)

- **Full-Stack Presentation:** Architected an end-to-end 3-tier solution separating Presentation, Business Logic, and Data Access layers, delivering responsive, server-rendered Razor Views with strongly typed ViewModels, Tag Helpers, and robust model validation.
- **Data Layer & Core Services:** Implemented EF Core with Unit of Work and Generic Repository patterns for transactional integrity, integrating ASP.NET Core Identity RBAC alongside custom services for file handling, trainer scheduling, and membership management.

E-Commerce Frontend Platform | Angular (17+), TypeScript, RxJS, Signals, Tailwind CSS, Flowbite | [Github](#) | [Live Demo](#)

- **Reactive UI & State Management:** Built a responsive Single Page Application featuring reactive cart state management powered by Signals and RxJS for real-time price calculations and instant synchronization.
- **Security & Network Interceptors:** Implemented custom HTTP Interceptors for secure JWT header injection across requests and established global error-handling pipelines.

WORK EXPERIENCE

Technical Support Engineer

Jun 2025 – Present

Vijua, Cairo, Egypt

- **Root-Cause Analysis & Diagnostics:** Conducted rigorous root-cause analysis (RCA) on production incidents by inspecting application logs, analyzing client runtime behavior, and isolating software defects to supply engineering teams with reproducible test cases.
- **Process Standardization & Efficiency:** Standardized defect reporting workflows in Trello using structured reproduction templates, reducing cross-functional bug resolution timelines by 20%.
- **SLA Resolution & Incident Management:** Delivered Tier 1/Tier 2 multi-channel technical support via email and live chat, consistently surpassing internal resolution SLAs in a fast-paced environment.

EDUCATION

Faculty of Computer and Data Science, Alexandria University

Sep 2023 – Present

- Major in Cybersecurity | Expected Graduation: 2027

New El Quds International School – IGCSE department

COURSES

Full-Stack Web Development (Angular/.NET) – Route Academy

Feb 2025 – Aug 2026

IT Infrastructure (CCNA, MCSA, NSE4, Sophos) – IT Gate Academy

July 2024 – Dec 2024

LANGUAGES

Arabic: Native Speaker / English: Advanced Proficiency
